THC	Model 102 PLUS - clutch standard	1956 to 1967
WHC	Model 102 PLUS - clutch standard	1967 to 1973
<p>Note: Letter 'L' after engine lettering or number denotes long shaft model * = Current production models</p>		

From 1963 a letter and number code is used at the end of the engine number to denote the month and year of manufacture.

The letter indicates the month and year of manufacture i.e. A3 = JANUARY 1963, B3 = FEBRUARY 1963, etc.

From 1973 two letters were used in the code to indicate the month i.e. AA3 = January 1973, BB3 FEBRUARY 1973, etc.

The letter 'L' is not used in this code sequence.

Therefore identification of a model and date of manufacture can be found as

follows: WSPCL 1734 BB3.

WSPCL indicates this is a long shaft Silver Century Plus. 1734 is the production number and BB3 indicates it was manufactured in February 1973.
